

2020: Calipsa and Cougar Monitoring Review

Calipsa achieved average false alarm reduction over 70% by filtering out alarms caused by non-human or vehicle movement.

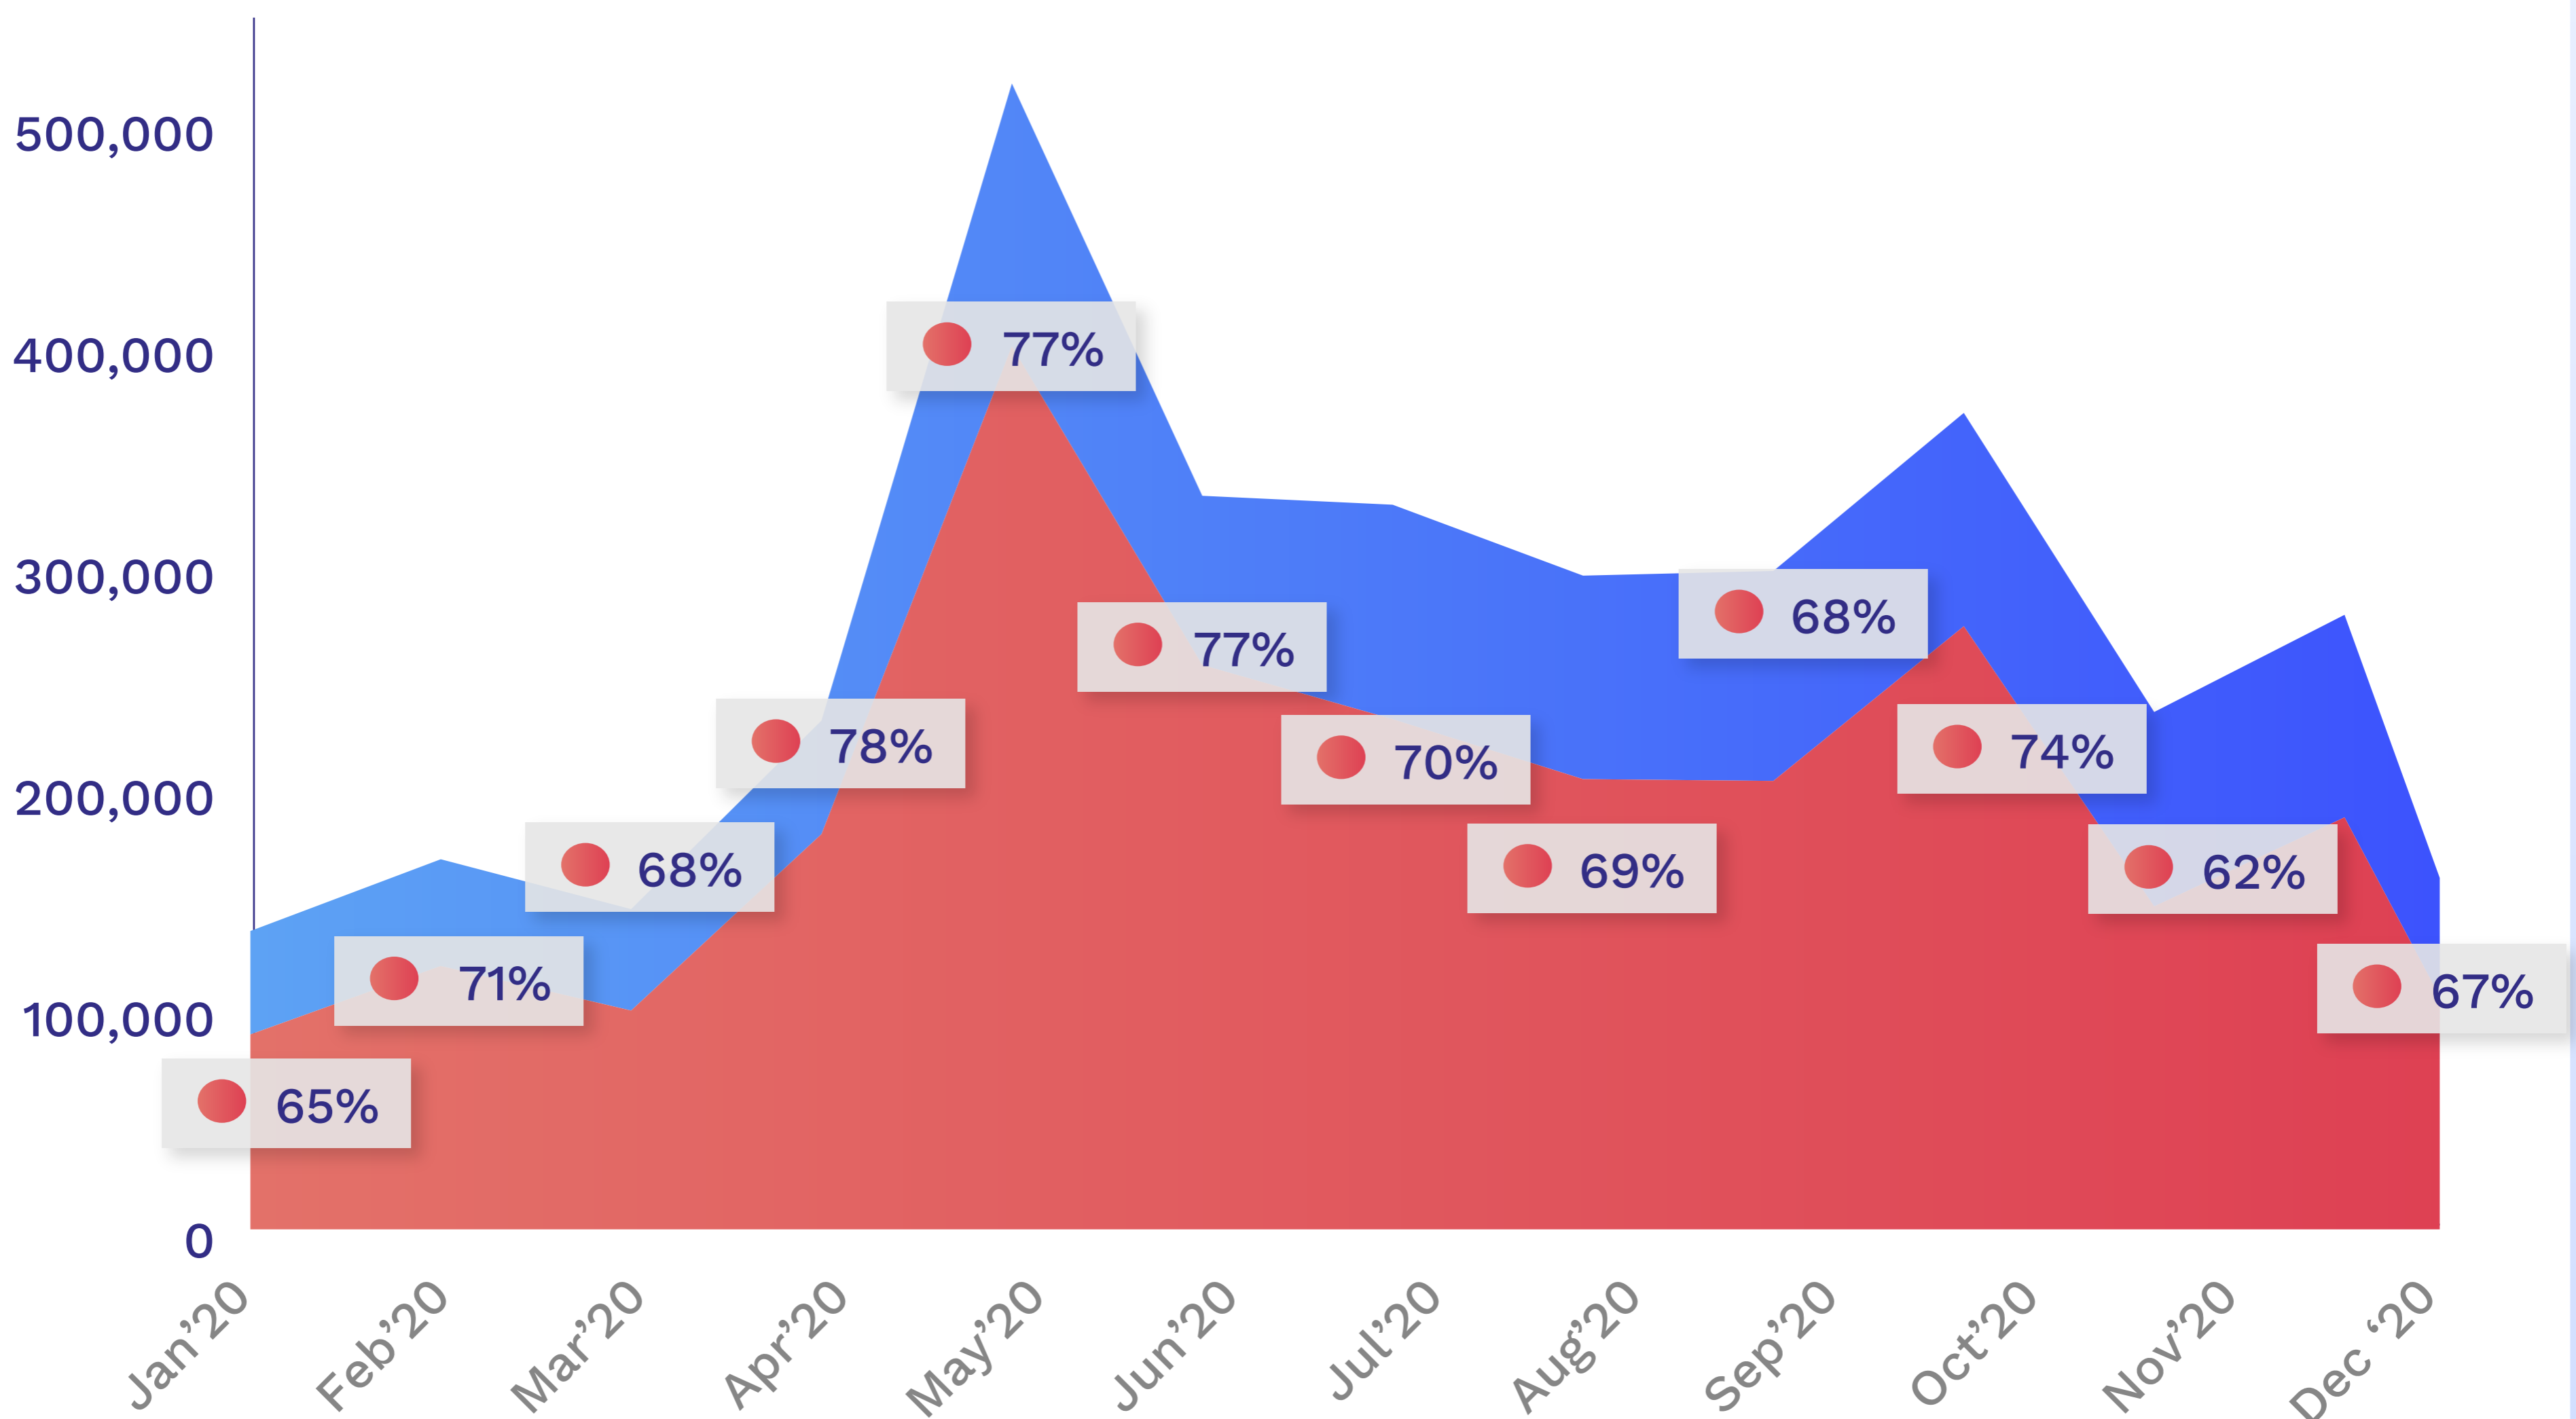

In 2020, Calipsa removed 2,368,824 false activations. This means less cameras were switched off, less site visits and increased efficiency

Calipsa's range of features, which includes camera masking and site scheduling, further enhance false alarm reduction rates.

False alarm reduction rate (%)

● True alarms ● False alarms

Better crime prevention starts with fewer false alarms
